

NO.	REVISION	DATE	APP.

A table like this can be very useful for charting revisions. It's up to you.

The drawing number MUST adhere to the following structure:

[Team Prefix]-[4 digit code]-[Date].pdf

The prefix for each team along with the 4-digit numbering scheme being used by your team can be found in the Wiki on the "BLUEsat Technical Documentation Database" page. If modifications to your team's numbering scheme are required then please ensure that you check existing documents so that naming remains consistent.

Enter date for the ORIGINAL drawing release.

Along with changing the Drawing Number after each modification to the drawing, the Revision should be incremented alphabetically.

ALWAYS work in METRIC. Try to use a standard scale such as:	
Full Size	1:1
Enlargement	2:1, 5:1, 10:1, 20:1, 50:1
Reduction	1:2, 1:2.5, 1:5, 1:10, 1:20, 1:50, 1:100, 1:200, 1:500, 1:1000, 1:2000, 1:5000

The templates provided are for A3 and A4 pages only. If you require a different size then please contact C. Hales (chales@bluesat.unsw.edu.au).

Don't forget to number all your sheets.

Enter the date the drawing was started on.

A handwritten signature looks more formal than text.

This should be the same date as that in the Drawing Number.
